

# TMK UP™ BPN

## Threaded & Coupled Buttress Pin Nose Connection

### 4 1/2" - 13 3/8"

The TMK UP™ BPN is a buttress pin nose connection specifically developed for drilling with casing applications. Customers seeking better-than-API performance appreciate the convenience of API buttress compatibility. The BPN connection features a pin nose-to-pin nose shoulder, allowing for torque capabilities higher than a standard API BTC connection. In addition to the enhanced performance properties, operators using the BPN have the advantage of being able to use standard API accessories without the need for crossovers. When repairs are needed, the BPN can take advantage of TMK IPSCO's extensive network of thread shops closest to a customer's area of operation.

### Applications

- Production casing, liners and tie-backs
- Rotating liner/casing to depth
- Rotating while cementing
- Frac string
- Drilling with casing

### API Buttress Thread Form

- Compatible with BTC
- 100% tensile efficiency
- Tighter tolerances than API

### Pin Nose-to-Pin Nose Shoulder

- 100% compression efficiency
- High torque capability for rotating down-hole

### Run-Out Threads

- Maximizes critical section area
- Increases connection strength in tension and compression

### Global Strength

TMK IPSCO is an industry leader in welded and seamless pipe, premium connections and accessories with the strength of more than twenty manufacturing facilities strategically located in the key energy producing areas of the world. Our legacy of quality, exceptional customer service and focus on innovation translates into unparalleled value for our customers. Our strength—in product and presence—gives customers a competitive edge, making us the ideal supplier for the oil and gas industry as well as many industrial markets worldwide.
